PROFESSIONAL POLITICIANS GOT US INTO THIS MESS.
TELL THEM YOU’VE HAD ENOUGH!

• **National Debt** – The politicians in Congress have failed us. They have piled up a $1.3 trillion deficit with no plan to fix it. George will lead by example declining a Congressional pension. He has 25 years of federal budget experience and knows it’s time to reinstate policies of job growth that will reduce debt. Our children are depending upon us to do what is right.

• **Foreign Policy** – Lt. Colonel Newberry is an unapologetic cheerleader for our military – the most honorable fighting force in the history of mankind. George believes we should support fledgling democratic movements around the world – including the Middle East.

• **States Rights** – George believes the states do a better job of solving problems than Washington. We know how to solve our problems. The federal bureaucracy is part of the problem. Getting block grants to the states, counties and cities allows for better decisions. It is simply common sense.

“When elected I will refuse a Congressional pension.”
