Dear Friends,

As a long time Beverly Hills resident, I am excited to be a candidate, however, I do not take this challenge lightly. Our City is in the midst of difficult times and solutions will not be easy, but I am prepared to invest my time and to bring my expertise to help find them.

Having twice been appointed to City commissions, I have had the honor and privilege to serve our residents. This has enabled me to develop a strong understanding about the workings of our City government. During the six years that I served as a member and Chair of the Traffic and Parking Commission, I saw the importance of creating consensus in order to find a common vision and goal. Currently as a member of the Recreation and Parks Commission, I am working to preserve our valuable green spaces and enhance our parks’ facilities for residents, children and our seniors.

My positions as Co-Chairman of the Department of Anesthesiology at Cedars-Sinai Medical Center and as Co-Managing Partner of the General Anesthesia Specialists Partnership Medical Group have given me expertise in complex political and business arenas. Through these experiences, I have developed skills which I will bring to the role of city council member.

Beverly Hills is truly a great city but there are many complex issues facing us including traffic and parking, the economic crisis, the Metro and development.

My mission is to continue to keep this City great and further enhance the quality of life for the residents. We must work together with honesty and candor in order to achieve this goal.

Please contact me directly (by phone or email) if you have any questions regarding my campaign. Your input is welcomed and encouraged.

Sincerely,

Julian A. Gold, M.D.
“Our city is at a critical moment in time. At risk are the city services which have been the cornerstone of the great quality of life for our residents. Decisions made today will have long lasting impact on our city’s future well being. Tomorrow’s city council member will require knowledge of our community and its different constituencies, objectivity and the ability to make thoughtful, reasoned and difficult decisions in a timely fashion. I have these qualities and will bring them to my service on the city council.”
