GOVERNOR SCHWARZENEGGER ANNOUNCES SUPPORT FOR PROPOSITION 71

*Says Stem Cell Research Initiative Can Help California Remain the
Global Leader in the Bio-Tech Industry and Save Lives in the Process*

SACRAMENTO -- Governor Arnold Schwarzenegger today announced his support for Proposition 71, the Stem Cell Research Initiative.

“I am, of course, a supporter of stem cell research. Research that we do now holds the promise of cures for tomorrow. California has always been a pioneer. We daringly led the way for the high-tech industry and now voters can help ensure we lead the way for the bio-tech industry. The creativity and resources are right here in California. We are the world’s bio-tech leader and Prop. 71 will help ensure that we maintain that position while saving lives in the process. I encourage Californians to join me in voting for Prop. 71.”
